Your Global **Edge** on Business

Facing today's globalization of markets, the most successful companies are the ones showing more competitiveness and adaptability.

Exactsoft innovates by proposing an enterprise resource planning (ERP) solution that is tailored to the company's individual way of doing things, without limiting their capacities to easily and quickly adapt to the realistic changes that affect the business world.

NewEdge is a complete ERP solution. It is specially designed for the small and medium-sized enterprises (SME) in full expansion. Although its simplicity ensures positive results and lucrative benefits, NewEdge is powerful enough to help companies realize their long-term vision into the future. This is due to its integrated capacities to expand worldwide.

Developed as a complete and integrated package instead of individual modules, NewEdge offers unsurpassed straight through processing.

Exactsoft uses the EdgeStart methodology that saves time and facilitates the deployment of the solution. This approach has proven to be ideal for companies with limited budgets, deadlines, and resources.

The NewEdge Advantages

- Simplicity** The intuitive interface reduces the learning curve and allows you to reach an exceptional level of operational performances.
- Integration** Crucial financial and commercial business data is always up-to-date and integrated; therefore it provides access to the most accurate information whenever desired.
- Adaptability** Exactsoft works in collaboration with its clients to ensure that the solution offered is perfectly adapted to their way of doing business.
- Scalability** From 5 to 150 users or from 1 or more locations, NewEdge has the ability to adapt itself to the growth of the company and help it reach its full potential.

About Exactsoft

Founded in 1992, Exactsoft is a leading supplier of integrated enterprise software solutions designed for the small and medium-sized enterprises (SME) in full expansion.

Exactsoft's mission is to provide world-class software that meets customer requirements and provides a growth path to the future.

By deploying the best technology, services and development resources, Exactsoft offers business solutions that unlock valuable information and improve efficiency. Exactsoft focuses on building strong customer relationships across a wide range of complementary services. Through its project management expertise, in-depth product knowledge and technical skills, Exactsoft's personnel closely collaborate with customers to successfully face their challenges.

A full range of services tailored to address individual customer requirements complement Exactsoft's comprehensive suite of integrated software solutions. Although its simplicity ensures positive results and lucrative benefits, it is powerful enough to help companies realize their long-term vision, promote rapid return on investments (ROI) and offer low total cost of ownership, now and in the future.

Exactsoft's solutions are presently installed in more than 250 sites and used by over 2000 end-users.
